CS110 / INDEPENDENCE ROAD

# pitch / Daniel P

Issued: Nov 10, 2026, 2:46 PM Pacific

Record: FORM-87874BE9C4FCF366B4F39A07

**Personal public verification code: VIEW-F7D74B4BB42295C1385C9AC8**

Include your own public code with every assignment, even in a team folder. Never submit your private recovery key.

SHA-256: 3b2071482ef3c6c7971eeea1682c0787f545a23f4d2aa8b12b81c6c0e77d8325

Verify the record number at courses.addp2p.com/development-road/independence/index.html?view=verify

An issued record preserves submitted information. It is not a grade or proof of comprehension.

**What do you understand about the work and finish line?**

i understand the work is hard but rewarding i understand that in the work we will need to know stuff like unity and other things for game development like the mindset collaborating with your team and your peers. for the finish line i understood the unity folders and setting everything together and making a folder for your project.

**What will you contribute? Name a task or useful capability.**

i will help the team by doing research using ai when need i will help with the whiteboard and help my team when they need help and fall behind on the assignment if i understand it. I will also help with the code and if needed the GitHub repository.

**What needs research, support or practice?**

research is coding like python or C++ i want to learn and research many different codes to help with game making or program developing or even websites. my support is my team peers or ai. i need practice on communication and learning when to be quiet.

**Your available work times and preferred contact method: Discord, email, text, classroom or other. Keep private addresses/numbers outside public exports.**

Preferred contact: Classroom

discord is a easy place or in the class room and theirs no time limit

**List your project tools and why you need them.**

my project tool will be Ai My brain and knowledge and google. we will need them for if we get confused or start to fall behind on the work.

**Required: name the AI you will use, its project task and how you will verify its output. Use course-provided/shared or approved local access if needed; no personal or paid AI account is required.**

AI: Chat Gpt

Task: it will help us with the code or the setup of the project

Verification: good answer and us giving it the input for us to get our output

**ai**

**Name**

Chat Gpt

**task**

it will help us with the code or the setup of the project

**verify**

good answer and us giving it the input for us to get our output
