Attention Accord plan

mission

a story we want to see is a minecraft mod with aspects of pokemon. a playable goal is to be to throw a pokeball at a minecraft mod

framework

my team a I choose P2P for the simple fact it will help us with the use of organized sources and will help us with the game engine setup.

Background owner Jonathan 2026-11-11T15:45 to 2026-11-10T16:22 Pacific

Assets owner Mio 2026-11-11T15:45 to 2026-11-10T17:37 Pacific

Body Frame owner Isaias 2026-11-11T16:22 to 2026-11-11T16:22 Pacific

Output owner Daniel 2026-11-11T15:45 to 2026-11-11T16:22 Pacific

Result owner Paul 2026-11-11T15:45 to 2026-11-10T16:22 Pacific

Background: Learn the lore from both source materials (Minecraft and Poke mon). Build the world of Minecraft, a free roam where the main character is a combination of Ash and Steve.

Assets: Assets: Getting the elements that will be edited and used in the creation of the mod: - Characters, text, animation, 3d models, fonts, audio, etc. Obtaining everything that will be used in order to achieve the results, aka also the things the audience will view.

Body Frame: Build/configure: Put the blocky world together, add an Ash-Steve character so he can walk around, and set up the basic controls for throwing Poke balls and catching Poke mon as well of building like in a Minecraft world.

The output is for are mod to allow the player/consumer to be able to throw a poke ball to a Minecraft mob it will also make a custom world when loaded for the player with bits of Poke mon while still looking like Minecraft.

Results: Results - We have achieved the results we wanted. We wanted to make a mod pack for the video game Minecraft where we added a poke-ball from Poke mon.

tech

As a team we have chosen to use unity as the main engine for our game because of our knowledge in C#. We are also going to be using Unity Hub and Package manager. We chose this because based on the lesson videos we saw, we learned a few things about characters and how to create a functioning game, so we have information to get started. Additionally, it is also because we felt that it would be easiest to work with.

Time code

Classes & components

Class | Responsibility | GameObject

pokeballitem | Allows players to throw poke balls | Poke Ball

PokeballProjectille | Handles Poke Ball throwing and collision | Projectile

CS110 / INDEPENDENCE ROAD

MobCaptureSystem | Detects and captures Minecraft mobs | Minecraft Mob
PokemonCompanion | Handles captured Poke mon companions | Pokemon Entity
PokemonWorldGenerator | Generates Poke mon-inspired terrain | Minecraft World

Variables / properties
Name : type | Value / purpose | Used by
pokeBallCount : int | Number of Poke Balls the player has | PokeBallItem
captureChance : float | Determines the chance of capturing a mob | MobCaptureSystem
targetMob : Entity | Stores the Minecraft mob being targeted | PokeBallProjectile
isCaptured : boolean | Checks whether a mob has been captured | MobCaptureSystem
pokemonName : String | Stores the captured Poke mon's name | PokemonCompanion

reuse

We can reuse the organization patters we are learning/learned from the 6 videos we saw on game development using Unity and Talsta. We can also reuse the story element to build upon what we have and use the skills we have learned to revise our work. We can also continue to further use AI to keep us on track and add new ideas.

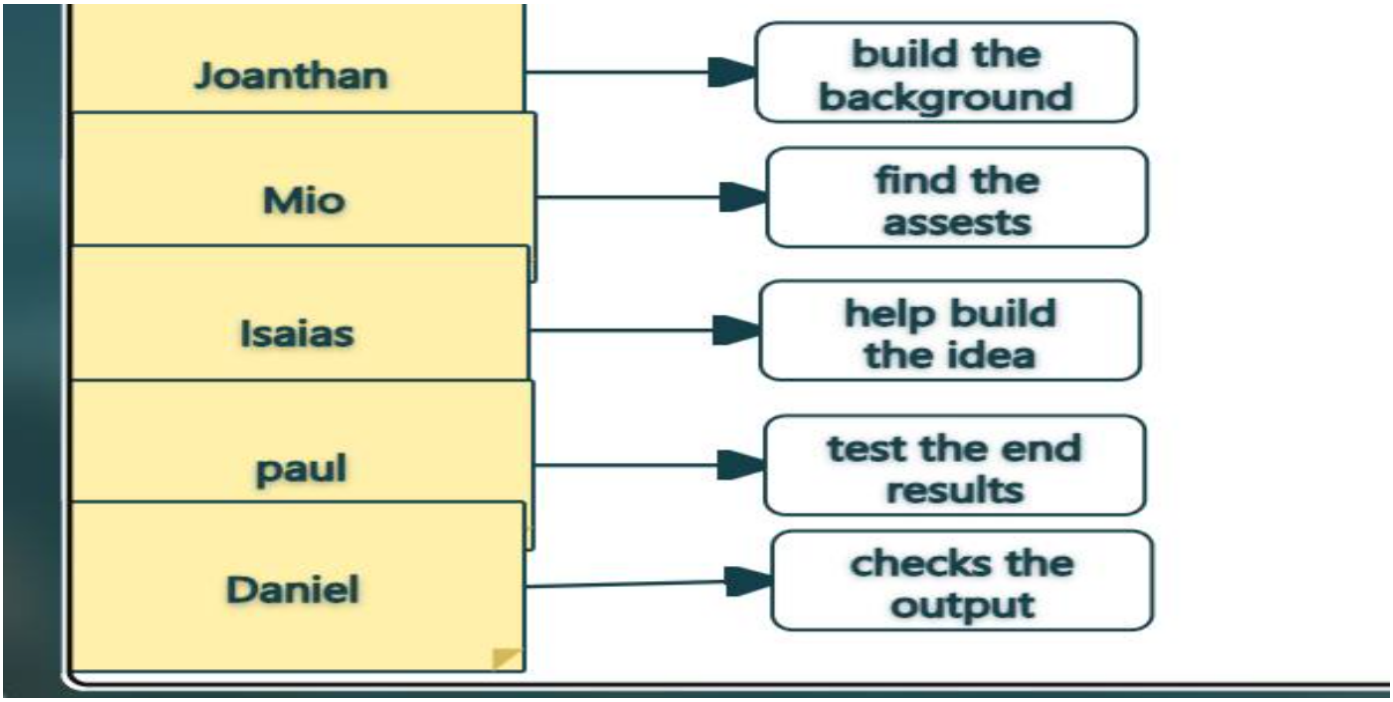

boardNotes

We all had planned to call over Zoom, however, we ran into technical difficulties so we decided to switch to Discord instead. We were on a call for over 2 hours working out our goals and coming up with ideas for our creation. We talked about what elements we want to include in our game, and we also created task boards to help us stay organized. We gave each other different jobs so we can work on separate things, we also discussed how we will be moving forward from this point on as a team.

Whiteboard

this diagram explains are teams jobs/roles that they will finish up and have done before the end of class
